

Pure Water Technology

By producing pure water, effectively it is the creation of an imbalance in the water molecule H₂O. This produces a desire (by the water molecules) to return to their natural balanced state.

The cleaning magic happens when the pure water acts like a sponge and absorbs all dirt, chemicals and minerals it comes across, in an effort to restore molecular order.

When this method of window cleaning is used, the final rinse dries to a perfect finish leaving the glass surface spotless and streak free.

The Window Wizard

Complete Pure Water
Window Cleaning System

The Window Wizard

Suited for existing businesses in the home or building maintenance industry like cleaning companies, garden services or property management companies to name a few, looking to extend their current client base or to offer window or solar panel cleaning as an additional service to their existing clients.

Small and Compact

The Window Wizard is the perfect product for somebody looking to start a window and solar panel cleaning business or existing window cleaning businesses wanting to extend their work force.

Small, lightweight and easily maneuverable.

It may be small but packs a punch, capable of reaching and cleaning up to three floors (ground, 1st floor and 2nd floor) without the use of a battery powered water pump.

This is achieved by utilizing specialized parts in conjunction with municipal water pressure and water fed poles.

Making the Window Wizard extremely versatile.

(Greater heights can be achieved if sufficient water pressure is available)

Ease of use

User friendly, easy to setup and maintain.

Technical support will be provided.

(Product service and maintenance will be provided at an additional cost)
